

Digital Storytelling with the iPad

<http://ipad4students.wikispaces.com>

Digital Storytelling

- Students/Teachers create short digital stories
- Experience digital stories/books created by others
- Create digital books

Questions to consider

- What is the desired learning outcome?
- Will the story share information?
Demonstrate a story arc? (e.g. set the scene, rising action, conflict, resolution, closing)
- How will learning be assessed?
- What materials are needed?
- Are materials being used freely available (copyright)?
- What planning process will be used to create the story?
- Who is the intended audience?
- How will the product be shared?
- How will feedback be provided?
- Will this be completed in class?
Individually or collaboratively?
- Will we create an example as a class?

My Ideas

A. Author Ideas (Story Content)

B. Brainstorming/Storyboarding Process

C. Creating Digital Stories
